SINGLE-SOURCE TURNKEY CONVEYOR SYSTEMS

Statera Designs, Manufactures, Integrates, Installs and Commissions World Class Turnkey Conveyor Solutions for Complete or Partial Packaging Lines

Statera designs and manufactures turnkey conveyor systems for complete and partial packaging lines. We offer a full range of product conveyor, case conveyor and pallet conveyor technologies and we specialize in projects requiring single source accountability to deliver reliable performance for our customers.

Our single source approach to turnkey conveyor solutions includes assessing, designing, specifying, manufacturing, programming, integrating, testing, installing, commissioning and handing-off production ready packaging lines. The broad scope of our responsibility reduces risk for the customer and frees-up their key personnel to focus on getting finished product out the door.

The Statera conveyor team includes highly trained engineers and project managers specializing in conveyor systems. They deliver engineering expertise supported by packaging line design tools and conveying system integration know-how to every project.

Our conveyor design and conveyor manufacturing capabilities are world class, and the materials of construction and conveyor components used in our systems are second to none.

CONVEYOR SYSTEMS HIGHLIGHTS

Turnkey Solutions, Single Source Accountability

- Statera assumes 100% responsibility for each turnkey project until the system is accepted by the customer
- Single point of contact simplifies project management for customers
- Assures timely project execution and guarantees system performance at hand-off
- Reduces risk of cost overruns; controls and manages scope creep

OEE Optimized Line Designs

- Validated, experience-based packaging line design tools set Statera apart from other conveyor providers
- Our design tools precisely calculate proper machine placement, optimum machine and subsequent conveyor speeds, and optimum accumulation capacities

Experienced Control System Design & Programming

- Designing conveyor control systems and programming the entire conveyor system to work seamlessly with the machines in the line is as essential to line performance as the machines themselves
- Our controls engineers provide fully integrated and programmed PLC based conveyor control systems that deliver steady-state line performance

TECHNOLOGIES & CAPABILITIES

| SERVICES & PRODUCTS | PRODUCT CONVEYOR | CASE CONVEYOR | PALLET CONVEYOR | FULL & PARTIAL PRODUCTION LINES |
|--|---|---------------|-----------------|---------------------------------|
